## Strand Hardware Supporting UK Manufacturing

Strand Hardware is showing their support to UK manufacturing by being one of the hundreds of companies who are promoting UK manufactured products through the Stoves Made in Britain campaign.

In 2011 a national campaign was launched to create a Made in Britain marque to represent all products which have been manufactured in the UK. The aim of the campaign is to create consumer awareness and to support the UK manufacturing industry. Since the launch the campaign has strengthened and has received significant attention from MP's.

*'It is vital to show support to British manufacturing and allow customers to identify products which have been made in Britain. The campaign is a great way to recognise this and Strand Hardware will be supporting the campaign through using the Made in Britain logo throughout our new catalogues and our fully revamped website.'*
